Education

Nalla Narasimha Reddy Group of Institutions, Hyderabad	Sept 2023 - Present
Bachelor of Engineering in Artificial Intelligence and Machine Learning	
Narayana Junior College	2021 - 2023
12th Grade - 80%	
Ravindra Bharathi School	2016 - 2021
10th Grade - CGPA: 10	

Coursework

DBMS, Operating Systems, Software Engineering, Artificial Intelligence, OOPS, Data Structures and Algorithms, Data Visualization, Machine Learning

Skills Summary

Programming: C, C++, Python, R, MYSQL,

Web: HTML, CSS, JavaScript, Node.js, Express.js

Libraries: NumPy, Pandas, Matplotlib, TensorFlow, Seaborn, PyTorch, Scikit-learn

Tools: Git, VS Code, MATLAB, AutoCAD, Jupyter Notebook

Soft Skills: Adaptability, Team Player, Leadership, Problem-solving, Time Management

Projects

Dino Game

Skills: C++, Java Script, HTML, CSS

- This is a 2D game, Side-scrolling endless running, obstacles move from left to right.
- The dinosaur is represented by ASCII art and moves up and down to simulate jumping.

AI-Powered Chat Bot

Skills: Java, NLP, MYSQL, HTML, CSS, Node.js, React

- AI-Powered chatbot platform involves combining of AI technologies and web development.
- Interface where users can type or speak to the chatbot

Amazon Clone – Frontend Web Application

Skills: HTML, CSS, JS

- Responsive replica of Amazon's homepage with structured navigation and clean layouts.
- Cross-browser and mobile compatible with semantic HTML and modular CSS.

AI-Voice-Assistance-Chat Bot

Skills: Python (Flask), NLP, HTML5+javaScript, MongoDB, Eleven Labs

- AI Voice Assistance is a voicebased system designed to interact with users through natural language
- It leverages speech recognition, natural language, understanding (NLU)
- TTS (text-to-speech) technologies are provided to real-time responses, perform tasks, and improve user accessibility

Code To Visualisation

Skills: Python, NLP, NL4DV

- Data Visualization in Python, is designed to transform raw and complex datasets into meaningful visual insights.
- project solves this problem by converting data into graphical and interactive formats that are easy to understand.
- Project is built using Python and powerful libraries such as Pandas, Matplotlib and Seaborn, and Plotly.

Positions and Experience

- **TARA (Cultural committee):** Coordinator, maintained event; promoted events.
- **NNRG MUN:** Head of Designing committee, Member of Secretariat.
- **NNRG MUN CUB:** Secretariat of Club

Certifications

- Deloitte Australia Technology Job Simulation on Forage — July 2025: Job simulation dashboard proposal.
- Front-End Web development — IBM (June 2025) Certifications
- MongoDB - Skill-a-thon
- Artificial Intelligence Fundamentals – IBM (Oct 2025)
- OCI Generative AI Professional – Oracle (Nov 2025)
- OCI AI Fundamentals – Oracle (oct 2025)
